

Improvement of skin condition after administration of Rejuran®

3-5 days after **first administration**

- ✔ Skin texture is softened
- ✔ Sebum secretion is reduced due to balance between oil and moisture of skin

2-4 weeks after **second administration**

- ✔ Skin elasticity improves by self-regeneration of collagen
- ✔ Fine wrinkles around eyes and overall face are improved
- ✔ Pore and dead cells are reduced

4-6 weeks after **third administration**

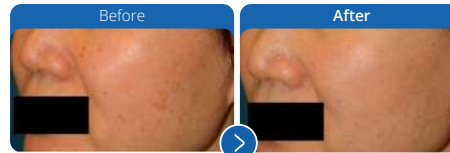

- ✔ Natural lifting effect by improvement of skin elasticity
- ✔ Skin volume is increased by thickening density and thickness of dermis layer

6-8 weeks after **fourth administration**

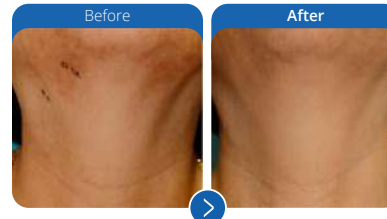

- ✔ Rejuvenates skin – 10 years younger

Uncover Your Natural Dazzling Skin: Rejuvenation with PN

Aging is inevitable but looking 10 years younger is possible. Rejuran® can activate the skin self-regenerative ability by delivering polynucleotide (PN) to dermis to improve physiological condition of damaged skin inside to return and balance up healthy skin.

PN: Polynucleotide

is a biocompatible substance that has excellent regeneration effect for skin.

Extracted from salmon DNA

that similar to human DNA.

Proven safety

because it contains high biocompatible DNA fragment that has undergone purification and aseptic sterilization process that will not induce immune response and cell overgrowth.

Multiple Treatment Areas

Treats wrinkles and loose skin on the face, around the eyes and on the body,

Why do you need Rejuran treatment?

IMPROVE

- Skin elasticity
- Skin thickness
- Skin tone

REGENERATE NEW SKIN CELLS

NATURALLY REDUCE

- Fine lines
- Wrinkles
- Pores

REHYDRATE SKIN

Frequently Asked Question

Q: How frequently do I need to get this treatment?

Rejuran® is not like a traditional filler and laser treatment. It fundamentally regenerates and recovers skin by activating the self-regenerative ability of the skin without irritation. Rejuran® recovers skin back to normal by 3-4 treatments with 3-4 weeks interval and for maintenance it can be done in every 6 months.

Q: Can I go back to a normal activity after the treatment?

You may get the swelling on the treated spot on the day of treatment, but it will be gone completely within 24 hours so you can go back to your normal activity after that.

Q: Which part of face is expected to be benefited the most from this treatment?

Rejuran® is good for overall face. Rejuran® does not only produces a great effect for wrinkles on your face, but also for back of your hands. It will greatly improve thin and damaged skin.

Q: Is there any side effects?

Rejuran® is composed of high biocompatible DNA fragment and has proven safety with no adverse reaction after administration and restore skin fundamentally without overgrowth.

Q: What is the difference between Rejuran® and skinbooster?

Skinbooster promotes mainly on skin hydration and collagen boosting, while Rejuran® works on skin restoration and activating cell growth, both for skin revitalization and hydration.
